

# COMMAND-CAM LIVE CUTTING DEMONSTRATION

With the challenges of travel, such as time away, travel cost, and weather, the Messer **Command-Cam** is a way to view a live cutting demonstration remotely via the internet. Multiple users from multiple locations can view the live demo simultaneously transmitted through PTZ network camera.

## COMMAND-CAM FEATURES

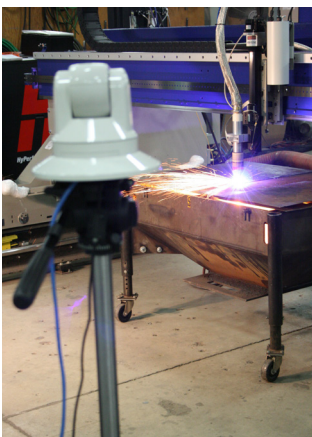

- Ultra Sharp SXVGA resolution (1280 x 960)
- Up to 30 frames per second

## YOU CONTROL VARIOUS FUNCTIONS INCLUDING:

- Optical zoom up to 22x
- Pan angle +/- 175 degrees
- Tilt angle -30 to 90 degrees

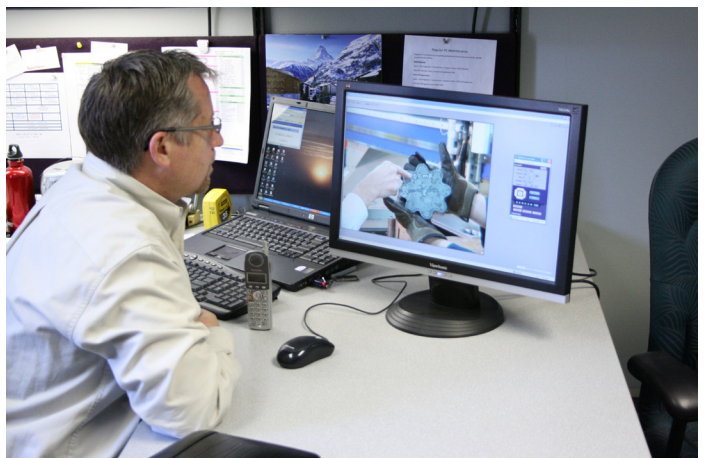

Live demonstration showing the cut material.

Remote Camera capturing live cutting.

Live demonstration in process.

Remote viewing of demonstration can be done from any computer in the world.

# CUSTOMER TESTIMONIAL

Messer Cutting Systems,

I would like to express my thanks to Messer Cutting Systems for their live Web Camera Presentation.

We had planned to visit the Messer Facility to learn more about the company and it's products, but due to severe weather, we were unable to make the trip.

Your salesmen quickly changed plans to go with a web camera presentation in lieu of a facility visit. This saved Terog Manufacturing a considerable amount of time and expense due to the reduction of travel. The presentation was very impressive! We had control of the web camera and were able to view all the machine features live. We were also able to "meet" a lot of the other staff, and discuss the machine's features. **This web camera presentation played a major factor in our equipment purchase.**

**I highly recommend the use of this technology!**

Thanks,

Jim Rogus  
*Terog Manufacturing Company*
