

EDGEMAX H20

COMPACT AND RUGGED UNITIZED EDGEMAX MACHINE WITH STEEL WATER TABLE FRAME.

Messer Cutting Systems EdgeMax H20 provides fast acceleration, precise motion, and stable cutting platform. From precision plasma, conventional plasma, or low power plasma systems, the EdgeMax H20 can be configured to provide custom solutions for all plate cutting applications.

FEATURES AND BENEFITS:

- Cut from gauge up to 4" thick.
- Widths from 6', 8' to 10' and variable length options from 12' to 24'.
- Digital AC 600 watt amplifiers with brushless AC.
- Up to 1700 IPM.
- Hardened pinions 2.5" diameter in the 'X' and 'Y' axes.
- 3/8" steel construction.
- Powder coated frame and guards.
- Perimeter welded inside and out.
- 3/8" thick replaceable rub rails.
- No need for a dust collector or ducting.
- Built-in lower tank section allows water level to be raised/lowered using compressed air, eliminating constant water refills.
- Standard water raise/lower system via manual HD ball valves with optional raise/lower via Global Control.
- Additives prevent part corrosion.
- HD lift out slag bins for easy cleaning.
- Removable slats.
