

PLASMAFLEX

EFFICIENCY BY AUTOMATION

Your solution for fully automated loading and unloading of plasma cutting machines.

Clear material flow.

Raw material goes in one side and cut parts out the other.

Reduces variability in production.

Less reliance on people to keep production flowing results in increased accuracy in scheduling and on time deliveries.

Significant improvement in safety.

The automated unloading of the cutting table eliminates the need to have operators on the table. Extensive safety system and fencing included.

Massive increase in productivity.

Fastest automatic material exchange: Processed nest is removed and next raw plate placed on cutting table immediately. Optimal solution to maximize torch-on-time.

Load/unload time, just under 2 minutes to get a fresh plate on the table.

Load and unload happen concurrently.

Reliable material flow control and feedback in real time.**No dependence on crane or forklift and driver.**

Eliminates bottlenecks.

Modular System which can easily be expanded and kept up-to-date:

Storage tower(s), serve multiple machines, extend with automatic picking, and sorting solutions.
