

TITAN III PROWPOWERFUL PRODUCTIVITY

MACHINE SALES PACKAGE INCLUDES THE
HYPERTHERM HPR400 & OXYFUEL CUTTING TORCH

STANDARD FEATURES

TITAN III

In the demanding world of metal fabrication, the Titan III Plasma Cutter emerges as a benchmark of resilience and precision.

Crafted with challenging environments in mind, this cutter is uniquely equipped to manage harsh cutting conditions and high temperatures.

Its innovative end truck design innovatively isolates sensitive electronics from the plate processing area, allowing for uninterrupted, heavy-duty operation.

The Titan III boasts the Global ControlPlus interface, offering intuitive, efficient cutting, and is adaptable for various metal types and thicknesses, including heavy plates.

With over 750 units operational across the United States, the Titan III's reliability and versatility are unrivaled, making it a favorite in industries from OEMs to steel service centers.

It's not just a machine; it's a powerhouse of productivity, offering a range of tools like vertical plasma, oxyfuel, bevel cutting, and drilling. The Titan III epitomizes the blend of innovative design and practical functionality, setting a new standard in metal processing technology.

DELIVERY AS SOON AS 5/10/2024

MACHINE CONFIGURATION AS LISTED ONLY.

MACHINE PACKAGE INCLUDES

- + Demo Machine w/ Low Operating Hours
- + Gantry Width: 12'.
- + Table: 10' X 32' Water Table (for up to 8' X 30' Material)
- + Control Type: Messer Global ControlPlus CNC Control. (Mounted on LHS on machine).
- + Powertrack: Left-hand overhead cable carrier.
- + Plasma: Hypertherm HPR400 XD.
- + Software: OmniBevel.
- + Bevel Option: Delta rotator.
- + Oxyfuel Option: Turboflame Oxyfuel Torch w/ Omniflow gas regulation.
- + Contouring Speeds: 400 IPM.
- + Positioning Speeds: Up to 1,700 IPM.
- + Machine Motion Accuracy: +/- .010" (.254 mm).
- + Machine Motion Repeatability: +/- .010" (.254 mm).
- + Material Cutting Capability: 26 gauge to 4" plate thickness.
- + Installation Includes: One year labor and warranty.
